LIZARDS OF OZ

Don Spencer/Allan Caswell

Published by MCA-Gilbey

There's Frill Necks, and Blue Tongues, Goannas and Skinks,
And some that survive where there's nothing to drink,
And none of them care what anyone thinks,
They're the wonderful lizards of Oz.

We haven't had dinosaurs for thousands of years,
But you can see lots of their cousins round here,
And you'll never know when one will appear,
They're the wonderful lizards of Oz.

Chorus

**The lizards of Oz are special and strange,
With dozens of species with quaint sounding names,
But without them Australia would not be the same,
We ought to like them because -
They're the wonderful lizards of Oz.**

If you try to catch one you'll probably fail,
Your fingers will slide down the length of his scales.
If you're lucky he'll leave you a piece of his tail,
The wonderful lizards of Oz.

But don't be discouraged it won't bother him,
If there's only a stump where his tail should have been,
In a matter of time it'll grow back again,
The wonderful lizards of Oz.

LIZARDS OF OZ

Chorus

There's Frill Necks, and Blue Tongues, Goannas and Skinks,
And some that survive where there's nothing to drink,
And none of them care what anyone thinks,
They're the wonderful lizards of Oz.

We haven't had dinosaurs for thousands of years,
But you can see lots of their cousins round here,
And you'll never know when one will appear,
They're the wonderful lizards of Oz.
