## WE'VE GOT ...

Don Spencer/Allan Caswell

Published by MCA-Gilbey

*In case I haven't mentioned your favourite animal -  
The one you want to hear a song about.  
Before we roll the credits,  
There are some animals of merit  
I'd feel really guilty leaving out.*

We've got camels,  
We've got buffalos,  
Rabbits, foxes, brumbies, hares and sheep.  
We've got dingoes,  
We've got the long-nosed bandicoot, budgies, chooks and geese.

We've got spiders,  
We've got bull ants,  
And lots of things that sting and buzz and bite.  
We've got the cockroach and the blowfly,  
And lots of moths that fly about at night.

We've got the flathead,  
We've got the ocean perch,  
Bream and ling and prawns and coral trout.  
We've got yabbies,  
We've got lobster,  
And of course we couldn't leave the mud crab out.

We've got bullfrogs,  
We've got tree frogs,  
Beetles, bees and butterflies and bats.  
We've got Balmain bugs and witchetty grubs,  
Quokkas, potoroos and native cats.

## WE'VE GOT ...

We've got eagles,  
We've got seagulls,  
The lyrebirds, the brolga and the crow.  
It's my intention to try to mention  
A few more special things before I go.

We've got the wallabies,  
We've got wallaroos,  
The numbat and the small marsupial mouse.  
It's hard to find the Tasmanian Tiger -  
But rumour says there's still a few about.

We've got camels,  
We've got buffalos,  
Rabbits, foxes, brumbies, hares and sheep.  
We've got dingoes,  
We've got the long-nosed bandicoot, budgies, chooks and geese.

We've got spiders,  
We've got bull ants,  
And lots of things that sting and buzz and bite.  
We've got the cockroach and the blowfly,  
And lots of moths that fly about at night.
